

REACHEL WINTERS BAGLEY

Coco Chanel said, "Fashion is not something that exists in dresses only. Fashion is in the sky, in the street, fashion has to do with ideas, the way we live, what is happening."

The artistic side of fashion allows you to express yourself with clothing choice, and subsequently a style that is uniquely yours. The scientific side requires you to strategize the right proportions of color, pattern, texture, and shape. If executed properly, the result is a confidence that will open all doors.

With experience in consulting hundreds of companies and individuals on their dress, appearance, and etiquette, I believe fashion is much more than what we wear. Fashion is an opportunity to introduce ourselves succinctly without ever opening our mouths, an opportunity to show respect for ourselves and those we encounter, fashion is an opportunity to inspire and contribute to the beauty of the world around us.

I adore any combination of travel, vegetarian cooking, modern art, French cinema, Italian opera, poetry, gardening, and my husband.
